

## AOKE Biotech Co.,Ltd

### Recombinant hepatitis B Core Antigen

Product code:	B0002
Lot No.:	20191010
Protein concentration:	2.24mg/ml
Expression:	E.coli
Format:	Purified, Liquid
Product form:	Produced by Combination Chromatography Purification in vitro, with 50mM PB (PH7.4, containing 0.1%NaN3 )as preservative buffer
Molecular weight:	Monosubunit,20KD;Polyglobular structure,~2200kD.
Storage:	Store at 2-8°C for one year
Tips:	This antigen is a recombinant hepatitis B virus core protein, which is a polyglobular structure, and can effectively capture the anti HBcAg antibody in the sample to be tested. It has excellent specificity, sensitivity and stability.
Purpose:	It is suitable for direct coating of neutralization competition method, indirect method and double antigen sandwich method.

#### Attentions:

1. This product is only used for scientific research, not for human experiment or human treatment;
2. In order to obtain the best result of the experiment, please adjust the concentration and process according to the actual situation.
