

AOKE Biotech Co.,Ltd

Recombinant hepatitis B e Antigen

Product code:	B0001
Lot No.:	20190403
Protein concentration:	2.5mg/ml
Expression:	E.coli
Format:	Purified, Liquid
Product form:	Produced by Combination Chromatography Purification in vitro, with 50mM CB(pH9.6, containing 0.1%NaN ₃)as preservative buffer
Molecular weight:	15.5KD
Storage:	Store at 2-8°C for one year
Tips:	The antigen is recombinant hepatitis B virus E protein, which can effectively capture the anti HBeAg antibody in the sample to be tested. It has excellent specificity, sensitivity and stability.
Purpose:	Neutralizing antigen or indirect coating suitable for neutralizing competition method.

Attentions:

1. This product is only used for scientific research, not for human experiment or human treatment;
2. In order to obtain the best result of the experiment, please adjust the concentration and process according to the actual situation.
