

COA of recombinant human Beta-2-microglobulin

Short name: B2M

Catalog number: B0103-04-01

Lot number:

Source: recombinant expression

Description: our recombinant human B2M is a His-tagged protein with good stability even it is challenged by a 37°C acceleration experiment.

Form: liquid

Buffer: sterile 1×PBS (pH7.4), 0.1%NaN₃

Concentration: mg/ml(Lot specific, determined by A280)

Purity: >95% by SDS-PAGE

Immunoreactivity: reaction with monoclonal antibodies specific to human B2M molecule.

Applications: Immunogen, calibrator in immunoassays, in vitro studies

Storage: -20°C for two years (4°C for frequent usage, -20°C for long-term storage. Avoid repeated freeze-thaw cycles).

Tips : The samples usually form an inhomogeneous state after freezing and thawing. Usually, protein concentration in the lower layer is higher than that of the upper layer. In order to get an uniform sample concentration, mix the sample gently with pipette and centrifuge it before use please.
